How this chart was made

Your birth details were converted into exact planetary positions using the Swiss Ephemeris - the astronomical calculation library trusted by observatories and professional astrologers worldwide. Every date, dasha period and dosha status here comes directly from that calculation, not from guesswork.

Nothing in this chart was written by AI. There is no interpretation in it at all: every line is a calculated value or the label of one.

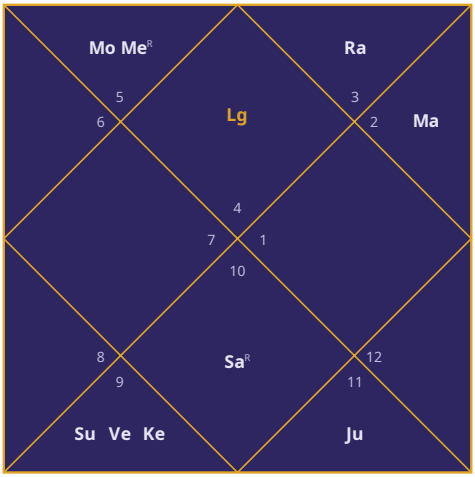

Lagna kundali (North Indian style)

Lg Lagna **Su** Surya **Mo** Chandra **Ma** Mangal **Me** Budha **Ju** Guru **Ve** Shukra **Sa** Shani **Ra** Rahu **Ke** Ketu **R** retrograde

The number in each house is the sign (1 = Mesha … 12 = Meena). The top-centre diamond is the first house; houses run anticlockwise.

Navamsa chart (D9)

Lg Lagna **Su** Surya **Mo** Chandra **Ma** Mangal **Me** Budha **Ju** Guru **Ve** Shukra **Sa** Shani **Ra** Rahu **Ke** Ketu **R** retrograde

The navamsa (D9) is the ninth division of the zodiac. Tradition reads it alongside the lagna chart for the strength of a graha and for marriage and later life.
